

tripods

mountaineer

range and specifications

Mountaineer tripods are available from the lightweight and compact Series 0, up to the sturdiest Series 3. While we recommend choosing the Series based on the focal length of the lens you intend to use (page 14), please also consider your style of shooting and carrying, and your priorities for lightweight or stability.

series

0.

top leg ø: 21.7mm

The Series 0 Mountaineer tripod is the lightest in the range, but also the shortest in extended height. Recommended for photographers for whom reduced equipment weight is of paramount importance, or for those using only lightweight cameras and lenses. The Series 0 uses Carbon eXact tubes with stiff HM carbon for all leg sections. For significant improvements in rigidity, tube diameters are now greater than on previous Series 0 Mountaineers: at 11.2mm, the thinnest section of the GT0542 is 40% larger than its predecessor. The top casting is also more rigid, and now features 3 leg angle settings.

series

1.

top leg ø: 25.3mm

Series 1 Mountaineer is a lightweight, standard height tripod. An excellent choice for photographers on the move, the Series 1 is recommended for DSLRs with 135mm lenses (up to a maximum of 200mm). The Series 1 uses Carbon eXact tubes with stiff HM carbon for all leg sections. For significant improvements in rigidity, tube diameters are now greater than on previous models: at 14.7mm, the thinnest section of the GT1542 is 22.5% larger than its predecessor.

series

2.

top leg ø: 29.0mm

Versatile, with a perfect balance of rigidity and reduced weight, Series 2 is the most popular of the Mountaineer tripods. With its newly designed top casting and Carbon eXact tubes, Series 2 is a solid tripod, recommended for DSLRs with 200mm lenses (up to 300mm maximum).

series

3.

top leg ø: 32.9mm

Series 3 is the most rigid in the Mountaineer range. Scaled for professional equipment, including medium format cameras and DSLRs with 300mm lens (400mm maximum), the Carbon eXact tubes and new design features of Series 3 Mountaineer tripods offer increased rigidity yet reduced weight.

kit.

Popular Mountaineer tripods matched with the best-suited Center Ball Heads are available as pre-configured kits.
