- Carbonitride Titanium AUS-8 Japanese Steel
- Ergonomic Aluminum & Glass Filled Nylon Handle
- Includes Camillus Sheath
- Lifetime Warranty

Item# 18510

Camillus 8" Carbonitride Titanium™ Fixed Blade Knife

- Carbonitride Titanium AUS-8 Japanese Steel
- Ergonomic Bamboo Handle
- Integrated Lanyard Hole
- Includes Camillus Sheath
- Lifetime Warranty

Item# 18506

Camillus 9" Our Very Best Hunter Fixed Blade Knife

- AUS-8 Japanese Steel
- Curly Maple Handle
- Includes Camillus Leather Sheath
- Sequentially Numbered
- Limited Edition
- Lifetime Warranty

Item# 19048

Camillus products are made of Carbonitride Titanium™ cutlery-grade steel and are through-hardened to hold an edge. Camillus knives will withstand the impossible task and continue delivering over extended use.

At Camillus our legendary products are supported by an equally legendary promise. If your Camillus product fails to perform due to defects in materials or workmanship, we will replace it regardless of age. Normal wear, sharpening, industrial use or abuse, misuse or neglect is not covered. Replacement blades are excluded from warranty. Defective products will be repaired, replaced or substituted with the same product or one of equal value. Send the product in its original box for proof of purchase along with an explanation of defect. Other consumer rights may vary from state to state.

As one of the oldest knife manufacturers, Camillus Cutlery has always answered the call for quality and will continue to do so with our hunting, fishing, sporting and tactical knives.

Craftsmanship with a worldwide following – it's been the Camillus way for over 130 years.

Camillus products are made of Carbonitride Titanium™ cutlery-grade steel and are through-hardened to hold an edge. Camillus knives will withstand the impossible task and continue delivering over extended use.

Terminology

AUS-8 Steel

AUS-8 is a Japanese medium-carbon, high-chromium stainless steel. One word says it all, "balance." It offers exceptional balance between toughness, edge sharpness, and corrosion resistance. Balance provides lasting value. AUS-8 ranks among the hardest, toughest, and most rust-resistant knife alloys. It's a trusted favorite that enthusiasts prefer time and again.

VG10 Steel

VG-10 is a unique formulation of steel with a high carbon content. It contains various amounts of one or more of the following: Chromium, Vanadium, Molybdenum and Cobalt. VG-10 is considered a "super steel," because it is designed to maintain sharpness and durability without becoming brittle, a major fault normally associated with exceptionally hard steel. VG-10 is also surprisingly corrosion resistant due to its fairly high chromium content.

Carbonitride Titanium

Carbonitride Titanium is one of the hardest surface treatments containing titanium. Harder than carbide. Harder than chrome. Our proprietary process creates a permanent molecular bond with the blade surface. Will not flake, blister, chip, or peel. A complex crystalline structure forms which protects the blade surface against wear, staining, and damage. Patent pending technology.

Bamboo

Bamboo is an environmentally sustainable organic material that regenerates itself faster than any wood. This means Camillus is preserving the environment by using a material that regenerates quickly. Bamboo handles are also moisture and stain resistant while providing a fantastic gripping surface.

Carbon Fiber

Carbon fiber is made from a polymer called polyacrylonitrile combined with woven Kevlar during a complicated heating process. It is widely used because it has a number of characteristics that make it ideal for products required to be light in weight but extremely strong! Carbon fiber is 5X Stronger than steel and lighter than aluminum!
