

Subwoofer Specifications

	10W5-D4		10W5-D8	
Fs (free-air resonance):	31.7 Hz		31.2 Hz	
Qts (total speaker "Q"):	0.384		0.412	
Qes (electrical "Q"):	0.402		0.457	
Qms (mechanical "Q"):			4.206	
Vas (equivalent compliance):	1.60 ft ³	45.3 liters	2.06 ft ³	58.3 liters
Xmax (linear excursion one-way):	0.295 in.	7.5 mm	0.281 in.	7.1 mm
Efficiency (1W/1m)*:	87.3 dB		87.7 dB	
Sd (effective piston surface area):	51.8 in ²	0.0334 m ²	51.8 in ²	0.0334 m ²
Re (DC resistance):	7.72 Ω (in series)		13.56 Ω (in series)	
Znom (nominal impedance):	Dual 4 Ω		Dual 8 Ω	
Pt (continuous thermal power handling):	250 Watts		250 Watts	

*Efficiency (1W/1m) is not an accurate indicator of a subwoofer's output capability and should not be used as a comparison to other subwoofers to determine which one is "louder"!

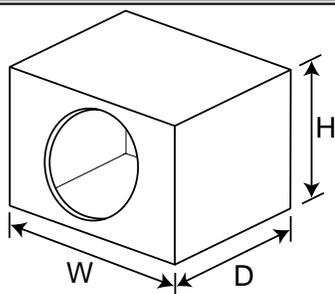

Physical Dimensions

Frame Diameter (A):	10.125 in.	257.2 mm	
Mounting Hole Diameter (B):	9.125 in.	231.77 mm	
Mounting Depth (C):	4.25 in.	107.95 mm	
Overall Depth (D):	4.875 in.	123.82 mm	
Magnet Diameter (E):	6.125 in.	155.57 mm	
Displacement:	0.055 ft ³	1.555 liters	

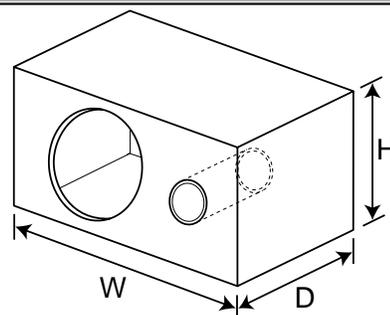

Be sure to allow 0.75 inches (19mm) for pole vent clearance on this driver.

Normal Recommended Enclosures (single driver)

Model	10W5-D4		10W5-D8	
	Volume (Net Int.)	width X height X depth	Volume (Net Int.)	width X height X depth
Sealed Enclosure	Not Recommended		Not Recommended	
Ported Enclosure	1.25 ft ³ 35.4 l	18" x 13" x 13.75" 457mm x 330mm x 349mm	1.50 ft ³ 42.5 l	18" x 13" x 16" 457mm x 330mm x 406mm
Port (inside dia. X length)	3" X 10.7" 76mm X 272mm		3" X 8.4" 76mm X 213mm	

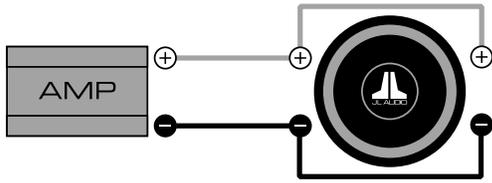

Sealed Enclosure

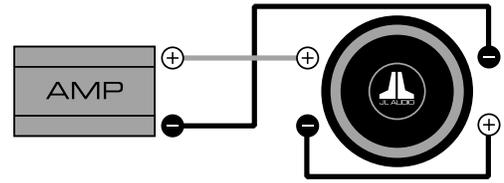

Ported Enclosure

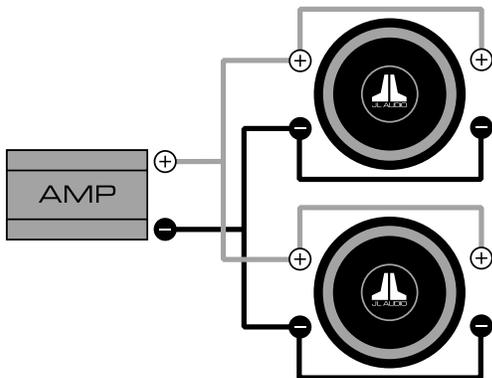

- Enclosure dimensions listed are external dimensions which assume the use of 0.75 inch (19mm) thick material. If you are using 0.625 inch (16mm) thick material, subtract 0.25 inches (6.5mm) from each dimension. Do not use material with a thickness of less than 0.625 inches (16mm).
- Enclosure volumes listed are NET internal volumes. Driver displacement, port displacement and brace displacement must be added to obtain the final gross volume. The dimensions listed have already taken this into account.
- When using two subwoofers in a common enclosure simply double the required volumes and use two of the recommended ports (when needed). Likewise, when using three subwoofers in a common enclosure simply triple the required volume and number of ports (when needed).

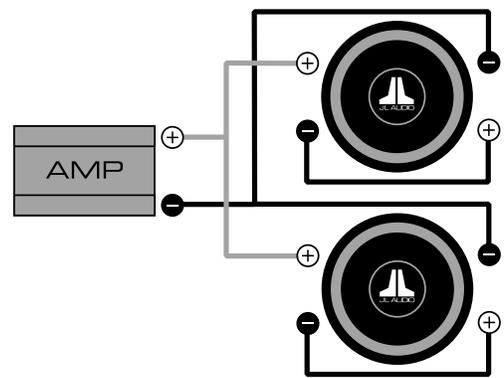

With coils wired in parallel, a dual 4Ω speaker will present a 2Ω load.
 With coils wired in parallel, a dual 8Ω speaker will present a 4Ω load.

With coils wired in series, a dual 4Ω speaker will present a 8Ω load.
 With coils wired in series, a dual 8Ω speaker will present a 16Ω load.

With coils AND speakers wired in parallel:
 2 dual 4Ω speakers (D4) will present a 1Ω load.
 With coils AND speakers wired in parallel:
 2 dual 8Ω speakers (D8) will present a 2Ω load.

With the coils wired in series and the speakers wired in parallel:
 2 dual 4Ω speakers (D4) will present a 4Ω load.
 With the coils wired in series and the speakers wired in parallel:
 2 dual 8Ω speakers (D8) will present a 8Ω load.

- Do NOT use different impedance speakers when using multiple subwoofers!
- JL Audio recommends using subwoofers as part of a bi-amplified system using high quality satellite speakers like our Evolution line of coaxial and component speakers. We do not recommend the use of passive crossover components (coils) on subwoofers. These components may adversely affect the performance of a subwoofer.
- When dealing with exceedingly long port lengths, we recommend the use of JL Audio's Flex-Port System. The Flex-Port tubing is flexible, allowing it to fit in otherwise tight locations. The Port mouths provide not only a convenient method of securing the port, but a smooth, rounded edge for the port termination as well.
