

## Subwoofer Specifications

	15W4-D2		15W4-D4	
Fs (free-air resonance):	19.2 Hz		19.5 Hz	
Qts (total speaker "Q"):	0.370		0.367	
Qes (electrical "Q"):	0.387		0.382	
Qms (mechanical "Q"):	8.738		9.370	
Vas (equivalent compliance):	12.03 ft <sup>3</sup>	340.7 liters	12.59 ft <sup>3</sup>	356.5 liters
Xmax (linear excursion one-way):	0.400 in.	10.2 mm	0.400 in.	10.2 mm
Efficiency (1W/1m)*:	89.7 dB		90.2 dB	
Sd (effective piston surface area):	131.0 in <sup>2</sup>	0.0845 m <sup>2</sup>	131 in <sup>2</sup>	0.0845 m <sup>2</sup>
Re (DC resistance):	3.32 Ω		6.41 Ω (in series)	
Znom (nominal impedance):	Dual 2 Ω		Dual 4 Ω	
Pt (continuous thermal power handling):	200 Watts		200 Watts	

\*Efficiency (1W/1m) is not an accurate indicator of a subwoofer's output capability and should not be used as a comparison to other subwoofers to determine which one is "louder"!

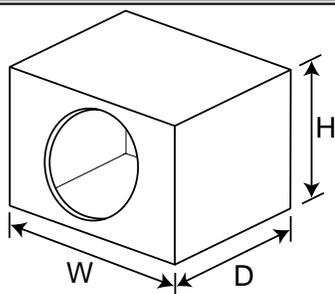

## Physical Dimensions

Frame Diameter (A):	15.1875 in.	385.76 mm	
Mounting Hole Diameter (B):	13.75 in.	349.25 mm	
Mounting Depth (C):	7 in.	177.8 mm	
Overall Depth (D):	7.625 in.	193.67 mm	
Magnet Diameter (E):	5.6875 in.	144.46 mm	
Displacement:	0.11 ft <sup>3</sup>	3.110 liters	

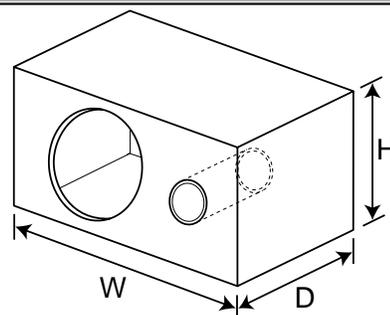

Be sure to allow 0.75 inches (19mm) for pole vent clearance on this driver.

## Normal Recommended Enclosures (single driver)

Model	15W4-D2		15W4-D4	
	Volume (Net Int.)	width X height X depth	Volume (Net Int.)	width X height X depth
Sealed Enclosure	2.25 ft <sup>3</sup> 63.7 l	22" x 16" x 15.25" 559mm x 406mm x 387mm	2.25 ft <sup>3</sup> 63.7 l	22" x 16" x 15.25" 559mm x 406mm x 387mm
Ported Enclosure	3.50 ft <sup>3</sup> 99.1 l	24" x 19" x 18" 610mm x 483mm x 457mm	3.75 ft <sup>3</sup> 106.2 l	24" x 19" x 19" 610mm x 483mm x 483mm
Port (inside dia. X length)	TWO 3" X 11.2" TWO 76mm X 284mm		TWO 3" X 10.1" TWO 76mm X 257mm	

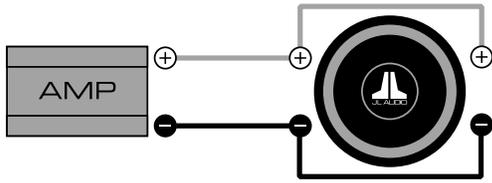

Sealed Enclosure

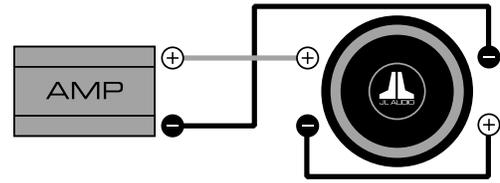

Ported Enclosure

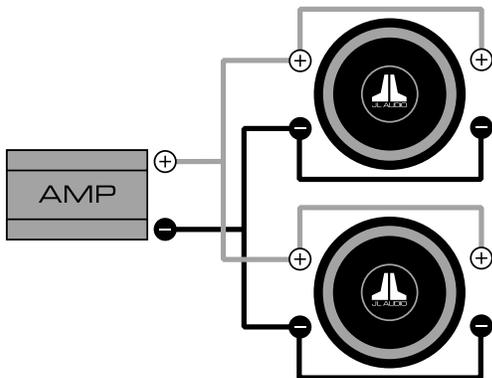

- Enclosure dimensions listed are external dimensions which assume the use of 0.75 inch (19mm) thick material. If you are using 0.625 inch (16mm) thick material, subtract 0.25 inches (6.5mm) from each dimension. Do not use material with a thickness of less than 0.625 inches (16mm).
- Enclosure volumes listed are NET internal volumes. Driver displacement, port displacement and brace displacement must be added to obtain the final gross volume. The dimensions listed have already taken this into account.
- When using two subwoofers in a common enclosure simply double the required volumes and use two of the recommended ports (when needed). Likewise, when using three subwoofers in a common enclosure simply triple the required volume and number of ports (when needed).

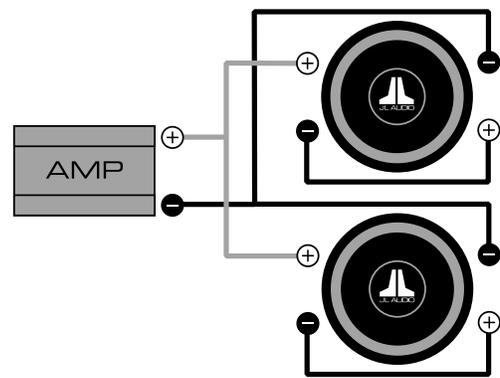

With coils wired in parallel, a dual 4Ω speaker will present a 2Ω load.  
 With coils wired in parallel, a dual 2Ω speaker will present a 1Ω load.

With coils wired in series, a dual 4Ω speaker will present a 8Ω load.  
 With coils wired in series, a dual 2Ω speaker will present a 2Ω load.

With coils AND speakers wired in parallel:  
 2 dual 4Ω speakers (D4) will present a 1Ω load.  
 With coils AND speakers wired in parallel:  
 2 dual 2Ω speakers (D2) will present a 0.5Ω load.

With the coils wired in series and the speakers wired in parallel:  
 2 dual 4Ω speakers (D4) will present a 4Ω load.  
 With the coils wired in series and the speakers wired in parallel:  
 2 dual 2Ω speakers (D2) will present a 2Ω load.

- Do NOT use different impedance speakers when using multiple subwoofers!
- JL Audio recommends using subwoofers as part of a bi-amplified system using high quality satellite speakers like our Evolution line of coaxial and component speakers. We do not recommend the use of passive crossover components (coils) on subwoofers. These components may adversely affect the performance of a subwoofer.
- When dealing with exceedingly long port lengths, we recommend the use of JL Audio's Flex-Port System. The Flex-Port tubing is flexible, allowing it to fit in otherwise tight locations. The Port mouths provide not only a convenient method of securing the port, but a smooth, rounded edge for the port termination as well.
